- Become part of a European hub for data centers, green solutions, animation and new media
- Be located in a fast developing and growing municipality in regards to population as well as businesses and workforce
- Be centrally located in the middle of Denmark
- Have access to a superb digital and physical infrastructure
- Have access to a highly qualified and motivated labour force and talents
- Become part of a leading industrial production areas in Denmark
- Be located in one of Denmark's most internationally oriented municipalities
- Be located in a family-friendly area - close to nature and local amenities, good child care facilities, easy access to an abundance of spare time activities
- Have access to international education at Cambridge and IB level

Viborg

Choosing Viborg

as the location for your next data center equals

- Excellent power stability: 99.997% national power grid up-time
- Close proximity to Denmark's largest and most stable and resilient substation (400 kV AC grid or 150 kV, north and south back-up)
- A cool climate ensuring profitable free air cooling
- Plenty of water available for cooling
- 100% electricity available from renewable sources
- Extremely low latency to Central Europe and the US - strong fiber grid with black fiber connection
- Excellent communication infrastructure
- Prime low risk sites available
- Dialogue-based, uncomplicated, short and transparent public approval procedures - the vast majority of the approvals are handled by the local municipality
- Access to Viborg Datacenter Supplier Network - network and cluster establishment
